Secure Serial Device Server NP5100

Ensure reliable connectivity, strengthen security,
and simplify the manageability of networks.

Thirty-two 3IN1 Serial Ports

Gets multiple types and a large number of serial devices connected easily

Support SSH & HTTPS

Works by encrypting data before sending it over the network, ensuring that serial data is transmitted securely.

OLED Display

Makes the basic information of the device visible, the configuration and operation become simple and easy.

Isolated Dual Redundant Power

Provides a second power source in case the primary power input fails, assuring maximum network uptime.

Industrial-grade Level 4 EMC Design

Endures harsh environments for any industrial applications, guarantees a good performance in industrial fields.
